Information Session, September 9, 2019
5:30pm - 7:00pm
Grad Room, 66 Harbord St, University of Toronto (Corner of Spadina Ave and Harbord St.)

Email: info@c4dmti.com  Website: www.c4dmti.com

1. Technology Skills
- Blockchain
- Artificial Intelligence
- Machine Learning

2. Business Skills
- Presentations
- Leadership
- Time Management

3. Application Areas
- Social Skills
- Finance
- Life Sciences
- Technology

4. Work Experience
- Guaranteed Six Months of Work Experience
“I joined the CO-Op Program shortly after receiving a Bachelor’s Degree. I was also excited to learn what the industry currently needs.

As a result of the study, I secured a position at a blockchain company. I recommend this program to all those who are looking for the key to start their professional careers and want to build up meaningful connections in the industry.”

Aris Feng

“This program helped me understand the landscape covered by Blockchain, Artificial intelligence and Machine learning, providing me with a better comprehension of their potential and limitations, as well as their practical applications from subject matter experts.”

Erica Roa
MGA – BSc Economics & Finance
EM Credit Analyst

“In the CO-OP Program, I have learned statistic knowledge, basic algorithms of Machine Learning and applied them in real life cases. In the classes, professors assigned students into small groups and taught us from the simple to difficult part gradually.

I successfully obtained admission to the master program offer from my ideal graduate school”.

Ming Zhou
Ryerson University

“This course equipped me with the foundations of technologies in a tangible way. I believe that the course will allow me to position myself as a bridge between the technical and non-technical teams in any organization”.

Lucia Lopez
Master of Global Affairs ’19
University of Toronto
Instructors

Luis Seco
We are a developer of talent.
Bringing talented students to successful companies we improve innovation and growth.
